

EDUCATION

• Shanghai Jiao Tong University

Shanghai, China

Bachelor of Engineering, Electronic Information (IEEE pilot class)

Sept 2021 - Current

- ▶ **Overall GPA:** 93.14/100.00, 4.08/4.30, (Rank 5/129)

- ▶ **Selected Courses:**

- 📖 **Computer Science:** Design and Analysis of Algorithms (A+), Principles and methods of program design (A+), Programming Practice (A+), Computer Network (A+), Operating System (A+), Programming Languages and Compilers(A+), Natural Language Processing (A+)

- 📖 **Mathematics:** Mathematical Analysis (A+), Linear and Convex Optimization (A+), Information Theory (A+), Complex Analysis (A+), Probability Statistics (A+)

- ▶ **Additional Academic Pursuit:** Engaged in a dual degree program in Mathematics and Applied Mathematics. Coursework includes: Complex Analysis, Abstract Algebra, Linear Algebra II

🔗 [Code](#) 📄 [Paper](#)

International Conference on Learning Representations (ICLR 2024)

EXPERIENCE

• SJTU-XAI-Lab

Shanghai, China

Undergraduate researcher, supervised by Prof. Quanshi Zhang.

Feb 2023 - Jan 2024

☰ Artificial Intelligence Interpretability

- ▶ **DNN Interactions Extraction Project**

- Given different DNNs trained for the same task, developed a method to extract their shared interactions.
 - By conducting contrast experiments, we showed that the extracted interactions can better reflect common knowledge shared by different DNNs.
 - I helped design the algorithm that balanced the generalization ability and sparsity of model interactions.

PROJECTS

• Chinese Slot Language Understanding

Shanghai, China

CS3602 Natural Language Processing

Dec 2023

- Developed a BERT-based pipeline for Chinese slot understanding.
 - Incorporated Lexicon information into the BERT backbone and achieved an improved result (from 77.99% to 79.44% in accuracy) on the given noisy dataset. 🔗 [GitHub](#) 📄 [Report](#)

• AAPMT: AGI Assessment Through Prompt and Metric Transformer.

Shanghai, China

CS3324 Digital Image Processing

Dec 2023

- Developed a interrelationship-based AGI metrics evaluation system allowing for the simultaneous evaluation of multiple AGI metrics.
 - Designed and implemented "Metric Transformer", where attention mechanism is applied to calculate each of metric jointly. 🔗 [GitHub](#) 📄 [Report](#)

• TranBlend: An Experimental Fusion of Textual Input in Saliency Prediction Models

Shanghai, China

CS3324 Digital Image Processing

Dec 2023

- Developed a model to simulate the text descriptions' influence on human's attention on images reflecting by saliency maps.
 - Blended image features from ViT and text features from BERT using cross-attention to enhance the performance of TransalNet. 🔗 [GitHub](#) 📄 [Report](#)

• Adaptive Huffman Coding: Analysis and Applications

Shanghai, China

ICE2601 Information Theory Course Project

May 2023

- Further enhanced the incremental Huffman strategy by adaptive Huffman coding to train Continuous Bag of Words (CBOW) model faster and better. 🔗 [GitHub](#) 📄 [Report](#) 📄 [Slides](#)

- **Shanghai Jiao Tong University Classroom Information Website**

Shanghai, China

ICE2604 Introduction to Software Engineering Course Project

Dec 2022

- Developed a website to help students find comfortable study spaces at SJTU.
- Used Vue2 as the frontend framework, Elasticsearch and Logstash as the search engine, ECharts for data visualization. [🔗 GitHub](#) [📄 Demo](#)

- **SNAKE Game: Pixel**

Shanghai, China

CS1605 Programming and Practice Course Project

July 2022

- Designed a SNAKE Game using C++ pdcourses.lib.
- Implemented some interesting game props such as "Rewarding Time" and "Freezing Speed" as well as AI Snake mode. [🔗 GitHub](#) [📄 Slides](#) [📄 Demo](#)

HONORS AND AWARDS

- Rui Yuan-Hong Shan scholarship (Rank 3/129) *2023*
- Academic Excellence Scholarship of SJTU (top 10%) *2022, 2023*
- Shao Qiu scholarship (Rank 5/129) *2022*
- Mathematical Contest In Modeling (Meritorious Winner) *2022*

MISCELLANEOUS

- **Programming**

- Proficient: Python (PyTorch, NumPy, Manim, etc.), C/C++, L^AT_EX
- Familiar: MATLAB, HTML/CSS, JavaScript, Vue, Linux, Shell , Verilog

- **Language**

- English (fluent) TOEFL 107(S24), GRE 327(V157 + Q170)

- **Service**

- Member of the Outreach Department, SJTU Spark Program *Oct 2021 - Sept 2022*
- Member of Academic Department, SJTU Student Backbone Training Program *Feb 2023 - Sept 2023*
- Student Mentor of CS2601 Convex Optimization, SJTU *Oct 2023 - Feb 2024*
- Student Mentor of CS2612 Programming Languages and Compilers, SJTU *Oct 2023 - Feb 2024*
